

FIVE-DAY WEEK IS LOGICAL IN MANY BASIC INDUSTRIES

New York, Dec. 11.—“The workers believe our nation has reached that period in its development when it can methodically change to the five-day week,” said President Green at a luncheon meeting given by the New York Building Congress. “If the five-day week of export trade would follow, Mr. Green pointed to the number of foreign commissions that visit New York to study our industrial superiority.”

“There are many lines of industry in this country that successfully on a five-day work basis. This is possible through the increasing use of mechanical equipment and the use of power. Machinery and electric power is transforming our industrial establishments,” Mr. Green said.

“The capacity to produce has increased to the point where serious consideration should be given to the five-day week. Productive ability, can not operate as steadily. In such industries as the automobile, the substitution of a shorter work week would distribute the working time over a longer period, thereby reducing overhead charges would be reduced, improved and scientific methods of production would make wasteful processes eliminated and labor turnover reduced and a more efficient organization made possible. The workers in this class would be greatly benefited by the shorter work week.”

Opponents of the five-day week were reminded by President Green of opposition to the eight-hour day by the labor unions which disapproved every prediction by advocates of the long work week system. The trade unions said that the cost of the production of added costs is likewise faulty as less hours has invariably been

equalization of our producing and consuming power. We must recognize the stern necessity of balancing our facilities of production at lower costs. "The field of industrial efficiency and productivity has not been fully explored or its limita-

There are a number of industries, some basic, which are governed by seasonal fluctuations and because of their great production defined," said President Green. "We have not reached the limit of American enterprise or topped the standard of American efficiency and service."

Washington, Dec. 11.—Can a big government official take the curse of a speed-up system?

all this is possible, according to the author, only if the "union" is not a "union" at all. This report is so subtle, so carefully worded, that it is difficult to see how it can be so accurate and so accurate. The author's "faithful" does not object to the "union" being a "union" and the rating of the men on other immaterial lines, and is for no other reason than that the "union" is not a "union" at all. The author's "faithful" does not object to the "union" being a "union" and the rating of the men on other immaterial lines, and is for no other reason than that the "union" is not a "union" at all.

"In the industries the condition of the wage earner has steadily improved. The 12-hour day is almost

MORE VACATIONS URGED:
10 MONTHS WORKING

New York, Dec. 11.—Two vacations a year, and a month for each was urged by Dr. Charles B. Piper, medical director of the Guardian Life In-

New York, Dec. 11.—Two vacations a year, and a month of each year, was the offer made by each of the two men, who are now in the city. The court said that the public good can not permit the principle of open courts and equality before the law to be limited, qualified or abandoned.

"Man's expectation of life would be much greater if he weighed 10 pounds less than the average his height and weight," says the graph.

man's "expecta[tions] of life would be much greater if he weighed 10 pounds less than the average his height and build would warrant." The doctor went on to explain that the weight gain up under the steadily increasing pressure of land on itself, and on the man, was the cause of the blood in the blood. The only cure for lard was more exercise, rougher food and more play.

BILLION-DOLLAR SAVING POSSIBLE IN BUILDING

New York, Dec. 11.—The American Society for the United Nations Building, Inc., has announced that the firm of Crisp Company is using aggregate, as a building material, in the construction of the new building.

Information to A. S. F. President Green indicates that Mexican workers are being utilized for the job of "jogged" United States.

PRESS UPHOLD IN LAW SUIT

New York, Dec. 11.—In a unanimous decision, the United States Supreme Court upheld the right of newspapers to publish without risk of injury the contents of official communications constituting suits of law.

In reply to a complaint that the publication was injurious to a plaintiff's reputation, the court said: "The publication is not a libel, and the plaintiff's reputation is not injured by the publication of the information in question."

and not in "high" wages. At their annual meeting in this city discussions revolved around this announcement by

and not in "high" wages. At their annual meeting in this city discussions revolved around this announcement by the society:

"How the national materials-handling bill can be reduced a billion dollars a year by utilization of equipment now available, relocation of stockpiles, and a proper co-ordination of production with equipment for moving materials."
